

Are you looking for a partner to help you transform the addiction recovery care landscape and promote lifelong wellbeing and support?

Look no further than Dolan Research International!

Founded in 2018, our team is dedicated to providing innovative, practical, and actionable solutions for individuals and organizations seeking to end the suffering of those they serve around the world. With an impressive track record of developing and **delivering over 30 training curriculums**, including creating robust LGBTQ inclusion training, we are uniquely positioned to consult, train your existing providers, and recruit and train additional personnel as you expand services to meet the growing need in our communities.

At the core of our passion lies the transformation of addiction recovery care, with a vision of creating teams of experts who will support and empower individuals on their recovery journey. Our goal is to create a world where addiction recovery is treated with the same level of care and attention as other medical conditions. We believe that everyone recovering from addiction deserves personalized and respectful care, just as our founder received as a cancer survivor.

Our team is dedicated to providing the highest level of care and support, ensuring that our clients receive the best possible outcomes. **We have trained over 1,000 Peer Coaches** and are constantly improving our training and certification programs as evidence-based practices and practice-based evidence becomes available.

Partnering with Dolan Research International means access to data-driven solutions that track and report on the metrics required by local, state, and national funding sources. **Working with us can lead to better outcomes for individuals recovering from addiction while saving you time and money.** We meet several requirements for working with companies who live inclusion and diversity — we are an LGBTQ+ Business Enterprise and Veteran-owned.

Let's work together to create a world where everyone has access to the resources they need to thrive.

Ready to take the first step towards transforming addiction recovery care and promoting lifelong wellbeing and support?
